## Chapter 4: Patterns (Part 2)

### Polymorphic Pattern

#### Problem:

Which one of the following scenarios is best suited for the use of the Polymorphic Pattern?

Attempts Remaining: **Correct Answer**

Choose the best answer:

- ☒ The organization acquired different companies over the years, serving the same markets with the same customers and there is a requirement to merge all systems into one.
- ☐ There is a requirement to keep many versions of a document, and these versions may have different fields for each version.
- ☐ The application has a base class with some derived classes.
- ☐ There are billions of documents.
- ☐ There is a requirement to store addresses for my customers.

Correct!
