

Final Exam

Final: Question 1

[← Back to the Question](#)

The correct answers are:

- `mongod --logpath /var/log/mongo/mongod.log --dbpath /data/db --fork`

 COPY
- `mongod -f /etc/mongod.conf`

 COPY

The following choices are incorrect:

- `mongod --dbpath /data/db --fork`

 COPY

This is incorrect because a `--logpath` must be specified in order to fork the process.

- `mongod --log /var/log/mongo/mongod.log --authentication`

 COPY

This is incorrect because both `--log` and `--authentication` are invalid flags - instead, they should say `--logpath` and `--auth`.
