Chapter 1: The Mongod Configuration File

Problem:

Consider the following:

```
mongod --dbpath /data/db --logpath /data/logs --replSet M103 --bind_ip '127.0.0.1,192.168.103.100' --keyFile /data/keyfile --fork
```

Which of the following represents a configuration file equivalent to the command line options?

Attempts Remaining: **Correct Answer**

Check all answers that apply:

```
storage:
  dbPath: "/data/db"
systemLog:
  destination: file
  path: "/data/logs"
replication:
  replSetName: "M103"
net:
  bindIp: "127.0.0.1,192.168.103.100"
security:
  keyFile: "/data/keyfile"
processManagement:
  fork: true
```

```
storage.dbPath: /data/db
systemLog.destination: "/data/logs"
replication.replSetName: "M103"
net.bindIp: "127.0.0.1,192.168.103.100"
security.keyFile: "/data/keyfile"
processManagement.fork: true
```

```
storage
  dbPath="/data/db"
systemLog
  destination="/data/logs"
replication
  replSetName="M103"
net
  bindIp="127.0.0.1,192.168.103.100"
security
  keyFile="/data/keyfile"
processManagement
  fork=true
```
