Final Exam

Final: Question 6

Problem:

Suppose a client application is sending writes to a replica set with three nodes, but the primary node stops responding:

Assume that none of the connection settings have been changed, and that the client is only sending insert statements with write concern **w: 1** to the server.

If after 30 seconds, the client still cannot connect to a new primary; which of the following exceptions will be raised by the Java Driver?

Attempts Remaining: **Correct Answer**   

Choose the best answer:

☐ `com.mongodb.MongoServerException`

☐ `com.mongodb.MongoCursorNotFoundException`

☒ `com.mongodb.MongoTimeoutException`

☐ `com.mongodb.MongoConfigurationException`

☐ `org.bson.BsonInvalidOperationException`

Correct!
