

Lecture Instructions

The config file using \_\_exec:

 COPY

```
storage:
  dbPath: /home/vagrant/data/db
net:
  bindIp: localhost,192.168.42.100
  port: 27001
  tls:
    mode: allowTLS
    CAFile: /home/vagrant/certs/M042_CA.pem
    certificateKeyFile: /home/vagrant/certs/server.pem
    certificateKeyFilePassword:
      __exec: "get_certificate_password"
systemLog:
  destination: file
  path: /home/vagrant/data/mongod.log
  logAppend: true
processManagement:
  fork: true
```

The mongod command to use \_\_exec:

 COPY

```
mongod --config mongod.conf --configExpand "exec"
```

The config file using \_\_rest:

 COPY

```
storage:
  dbPath: /home/vagrant/data/db
net:
  bindIp: localhost,192.168.42.100
  port: 27001
  tls:
    mode: allowTLS
    CAFile: /home/vagrant/certs/M042_CA.pem
    certificateKeyFile: /home/vagrant/certs/server.pem
    certificateKeyFilePassword:
      __rest: "https://s3.amazonaws.com/university-courses/m042/password.txt"
      trim: "whitespace"
systemLog:
  destination: file
  path: /home/vagrant/data/mongod.log
  logAppend: true
processManagement:
  fork: true
```

The mongod command to use \_\_rest:

```
mongod --config mongod.conf --configExpand "rest"
```
