Final Exam

Question 3

Problem:

Which of the following statements is/are true?

Attempts Remaining: **Correct Answer**   

Check all answers that apply:

☒ Collations can be used to create case insensitive indexes.

☐ MongoDB indexes are markov trees.

☐ Background index builds block all reads and writes to the database that holds the collection being indexed.

☒ It's common practice to co-locate your **mongos** on the same machine as your application to reduce latency.

☒ By default, all MongoDB user-created collections have an `_id` index.
