## Chapter 5: Conclusion

### Final Exam: Question 10

---

[Back to the Question](#)

#### Correct Option

- *The Polymorphic Pattern*

The problem states that bodegas sell a variety of items from different categories, with different purposes and properties. In this case, the Polymorphic Pattern will be the best candidate to catalog this set of goods.

#### Incorrect Options

- *The Bucket Pattern*
- *The Computed Pattern*
- *The Extended Reference Pattern*
- *The Subset Pattern*
