Chapter 4: Patterns (Part 2)

Bucket Pattern

Problem:

Which one of the following requirements in our system is the best candidate to use the Bucket Pattern?

Attempts Remaining: **Correct Answer**

Choose the best answer:

- ☐ Our system ingests 10 million pieces of data per day from 1 million devices, with 20% coming from 10 devices.
- ☐ Our system must embed a one-to-many relationship in one of our models, however, some of the result documents would be too big.
- ☐ Our system handles 1 million IOT devices.
- ☐ Our system performs sums and averages over all elements of certain arrays.
- ☒ Our system ingests thousands of log lines each day for each host it monitors.

Correct!
