### Final Exam

## Final: Question 5

### Problem:

Given the following replica set configuration:

COPY

```
conf = {
  "_id": "replset",
  "version": 1,
  "protocolVersion": 1,
  "members": [
    {
      "_id": 0,
      "host": "localhost:27017",
      "priority": 1,
      "votes": 1
    },
    {
      "_id": 1,
      "host": "localhost:27018",
      "priority": 1,
      "votes": 1
    },
    {
      "_id": 2,
      "host": "localhost:27019",
      "priority": 1,
      "votes": 1
    }
  ],
}
```

Correct! [SEE DETAILED ANSWER](#)

```
    "host": "localhost:27020",
    "priority": 0,
    "votes": 0,
    "slaveDelay": 3600
  }
]
```

What is the most likely role served by the node with "\_id": 3?

Attempts Remaining: **Correct Answer**   

Choose the best answer:

- ☒ It serves as a "hot" backup of data in case of accidental data loss on the other members, like a DBA accidentally dropping the database.
- ☐ It serves to service reads and writes for people in the same geographic region as the host machine.
- ☐ It serves as a hidden secondary available to use for non-critical analysis operations.
- ☐ It serves as a reference to perform analytics on how data is changing over time.

Correct!
