Final Exam

Final: Question 7

Problem:

Assume a collection called `people_heights` with documents that look like this:

```
{
  "name": "Ada",
  "height": 1.7
}
```

COPY

Which of the following queries will find **only** the 4th- and 5th-tallest people in the `people_heights` collection represented by the `coll` object?

Attempts Remaining: **Correct Answer**

Choose the best answer:

☐ `coll.find().sort(orderBy(descending("height"))).skip(5).limit(3)`

☐ `coll.find().sort(orderBy(descending("height"))).limit(5).skip(3)`

☐ `coll.find().sort(orderBy(descending("height"))).skip(3).limit(5)`

☒ `coll.find().sort(orderBy(descending("height"))).skip(3).limit(2)`

Correct!
