Final Exam

M312 Final Exam, Question 4

Problem:

Which of the following is/are true of chunks in a sharded cluster?

Attempts Remaining: **Correct Answer** ✓ ○ ○

Check all answers that apply:

☑ Chunks that contain documents that all share a single value of the shard key cannot be split.

☑ It is possible to change the chunk size in a sharded cluster.

☑ The sharded cluster balances the number of chunks on each shard, not the amount of data.
