Chapter 4: Patterns (Part 2)

Other Patterns

<   **Back to the Question**

Correct Option:

- The Outlier Pattern

  In this use case, an alternative to redesigning the whole system and maybe not meeting the performance requirements already achieved, could be to use the Outlier Pattern. The list of `contacts` can be split into many documents once it surpasses a certain size. Also, the application may want to have a different way to display the `contacts` by grouping them into many pages for larger sets of contacts.
