Chapter 1: Authentication

Authentication Methods

Problem:

Which of these authentication methods will fail if a server is started with the following options?

```
                                                    COPY

$ mongod --auth
$ mongo
use admin
db.createUser({user: 'kirby', pwd: 'password', roles: ['root']})
```

Attempts Remaining: **Correct Answer**

Check all answers that apply:

- [x] ```
  $ mongo -u kirby -p password
  ```

- [ ] ```
  $ mongo admin -u kirby -p password
  ```

- [x] ```
  $ mongo
  db.auth('kirby', 'password')
  ```

- [ ] ```
  $ mongo
  use admin
  db.auth('kirby', 'password')
  ```
