Final Exam

Final: Question 1

Correct Answer:

-
  ```
  Bson query = and(eq("winner_party", "Republican"),
                   gte("winner_electoral_votes", 160));
  ```
  📋 COPY

This will find the documents whose `winner_party` is `Republican`, and whose `winner_electoral_votes` is greater than or equal to 160.

Incorrect Answers:

-
  ```
  Bson query = and(eq("winner_party", "Republican"),
                   lt("winner_electoral_votes", 160));
  ```
  📋 COPY

This will find all Republican winners with *less than* 160 electoral votes.

-
  ```
  Bson query = gte("winner_electoral_votes", 160);
  ```
  📋 COPY

This will find all election winners with at least 160 votes, including those who are not Republicans.

-
  ```
  Bson query = and(eq("winner_party", "Republican"),
                   lte("winner_electoral_votes", 160));
  ```
  📋 COPY

This will find all Republican winners with **at most** 160 electoral votes.

-
  ```
  Bson query = and(gte("total_electoral_votes", 160),
                   eq("winner_party", "Republican"));
  ```
  📋 COPY

This will find all Republican winners who ran for election at a time when the total number of electoral votes was **160 or greater**.
