Chapter 4: Patterns (Part 2)

Lab: Apply the Bucket Pattern

< **Back to the Question**

A and **B** are valid implementations. Both documents allow for a correct plotting of all the necessary information to process the reports, the response time for reporting generation and metric updates is both predictable and fast, keeping a steady data growth.

Option **C** is the most space- and write-efficient. However it is not viable because it does not allow for the specified reporting granularity of 5 minutes.
