Final Exam

Question 2

Problem:

For this final exam question you'll need to download the certificates that we've been using throughout the course.

There is a command-line tool that we've used during this course. Use that tool to extract the entire certificate from `client.pem`.

Once you've got the certificate copy and paste it into the text area below.

Note: Make sure you use the name option "RFC2253" and run the command from inside the **database** VM to prevent false negatives. Also, make sure to copy **the entire** certificate. Don't just copy the part in between "BEGIN CERTIFICATE" and "END CERTIFICATE". The first three lines should say:

COPY

```
Certificate:
    Data:
        Version: 3 (0x2)
```

Attempts Remaining: Correct Answer ✓ ◯ ◯

Enter answer here:

```
Certificate:
    Data:
        Version: 3 (0x2)
        Serial Number: 266611 (0x41173)
    Signature Algorithm: sha1WithRSAEncryption
        Issuer: C=US, ST=New York, L=New York
```

Correct!	See detailed answer
