Lecture Instructions

Print configuration file:

```
cat /etc/mongod.conf
```
COPY

Launch standalone mongod:

```
mongod -f /etc/mongod.conf
```
COPY

Connect to mongod:

```
mongo --host 127.0.0.1:27017
```
COPY

Create new user with the `root` role (also, named `root`):

COPY
```
use admin
db.createUser({
   user: "root",
   pwd: "root123",
   roles : [ "root" ]
})
```

Connect to mongod and authenticate as `root`:

```
mongo --username root --password root123 --authentication
```
COPY

Run DB stats:

```
db.stats()
```
COPY

Shutdown the server:

```
use admin
db.shutdownServer()
```
