Chapter 3: Patterns (Part 1)

Extended Reference Pattern

Problem:

Which one of the following scenarios is the best candidate to use the *Extended Reference Pattern* to avoid doing additional reads through joins/lookups?

Attempts Remaining: **Correct Answer**

Choose the best answer:

○ An order model needs to store the product ID, the price sold, and the quantity ordered for each product in an order.

○ A product model needs to store references to images of the product that are kept in an external location outside the database.

◉ An app needs to retrieve a product and information about its supplier.

○ A product model needs to store a counter representing the number of times it was purchased.

○ An app needs to retrieve a product and its ten most recent reviews.
