**Chapter 4: Resiliency**

Ticket: Principle of Least Privilege

< **Back to the Question**

To complete this ticket, you had to create a user that only has **readWrite** access to the **mflix** database only.

Add New User

SCRAM Authentication

SCRAM is MongoDB's default authentication method.

mflixAppUser

e.g. new-user_31

••••••••••••   SHOW

🔑 Autogenerate Secure Password

User Privileges

Atlas admin	Read and write to any database	Only read any database

Hide Advanced Options

Advanced Roles/Privileges

Select a role and what database it's associated with.

Leaving Collection blank will grant this role for all collections in the database.

readWrite	@	mflix	*|

+ add another role

☐ Save as temporary user   Cancel   Add User

Then replace the authentication credentials, with this new user ones, in the MongoDB URI SRV string in your configuration file:

```
mongodb+srv://mflixAppUser:mflixAppPwd@<YOUR_CLUSTER_HOST>/admin
```

📋 COPY
