Lecture Instructions

Show collections in config database:

```
use config

show collections

 COPY
```

Find one document from the chunks collection:

```
db.chunks.findOne()

 COPY
```

Change the chunk size:

```
use config

db.settings.save({_id: "chunksize", value: 2})

 COPY
```

Check the status of the sharded cluster:

```
sh.status()

 COPY
```

Import the new products.part2 dataset into MongoDB:

mongoimport /dataset/products.part2.json --port 26000 -u "m103-admin" -p "m103-pass" --authenticationDatabase "admin" --db m103 --collection products
